DWYKA RECEIVES US\$130,000 FROM DIAMOND SALE

Dwyka Diamonds Limited ("Dwyka" or "the Company")(Tic:DWY), the Aim listed diamond producer and developer, today announces that it has sold an 18.11 carat octahedron diamond of H/I colour and SI2 quality for in excess of US\$7,100 per carat from the Company's Nooitgedacht Alluvial Mine in South Africa.

Commenting on the sale today Melissa Sturgess, Executive Chairman, said: "Today's US\$130,000 diamond sale follows a trend of strong sales for 2005, which has also seen a parcel sold for US\$200,000 and a single 54 carat stone generating US\$360,000 of revenues for Dwyka. What Dwyka shareholders are now seeing are the clear benefits of the optimisation programme we undertook at Nooitgedacht plant to improve all areas of diamond production."
